Synthesised Free Amino Acids and Low Molecular Weight Oligopeptides for rapid absorption

AMINOSTIM stimulates the plant metabolism, and increases its natural resistance to various stress situations.

AMINOSTIM penetrates directly into the cells of the plant by its own means.
Its absorption does not tax the plant's energy and therefore is independent of chlorophyll-activity.

Significant effects are recorded on criteria such as: plant vigor, yield, fruit coloring, sugar content, caliber, firmness, shelf life and many other quality improvements.

PRECAUTIONS

- AMINOSTIM can be mixed with most fungicides, insecticides and foliar fertilizers.
- On young plants, use a lower dose.
- Shake well before use.
- After use close the cap firmly.
- Store out of range of the sun and below 35° C.
- Best before 36 months after fabrication date.

DOSE AND APPLICATION

Foliar: 0.5 to 1 litre/Ha

Fertigation: 1.5 to 3 litres/Ha

Well Suited to help combat stress from heat, frost, drought, water deficit irrigtion, pest & disease, wind or chemical damage.

COMPOSITION

It is guaranteed that AMINOSTIM contains no less than 3.750 mg / litre of aminoacids.

Amino acid	Mg / l	Aminogram	Mg / l
Glysine	67.5	Fenilalanine	191.3
Valine	191.3	Methionine	157.5
Proline	315.0	Threonine	112.5
Alanine	495.4	Serine	146.3
Aspart. Ac.	168.8	Histidine	112.5
Arginine	315.0	Glicocol	360.0
Gluta. Ac.	33.8	Tyrosine	56.3
Lysine	191.3	Glutamine	33.8
Leucine	619.1	Cystine	11.3
Isoleucine	168.8	Others	3.0

Element	w/v
Total Nitrogen (N)	6 %
Nitrogen (N) as urea	3.76 %
Nitrogen (N) ammonium	1.47 %
Nitrogen (N) as nitrate	0.50 %
Nitrogen (N) organic	0.30 %
Organic matter	2.0 %
Phosporus (P2O5)	3.0 %
Potassium (K2O) water soluble	5.0 %
