CITOBLOOM ZIM contains amino acids, cytokinins and micro-nutrients that promote plant growth and development, particularly during early plant development.

CITOBLOOM ZIM also contains zinc, iron and manganese; these micronutrients deliver a balanced nutrition during early plant development.

CITOBLOOM ZIM has been manufactured under strict quality requirements

CITOBLOOM ZIM is specifically designed to improve both shoot growth and cluster development in grapes. It also improves leaf function by increasing chlorophyll content in leaves.

APPLICATION AND COMPATIBILITY

CITOBLOOM ZIM can be safely applied to both shoots and clusters. **CITOBLOOM ZIM** is compatible with most insecticides, fungicides and foliar nutrients, however it is recommended to perform a jar test before application. Do not mix with copper based product.
