

BIOSTIMULANTS

Category: Biostimulants
Formulation: Soluble Liquid (SL)

Foliar/ Fertigation Application

AMINOSTIM

AMINOSTIM, stimulates the plant metabolism, and increases its natural resistance to various stress situations.

AMINOSTIM penetrates directly into the cells of the plant by own means. Its absorption does not tax the plant's energy and therefore is independent of chlorophyll - activity.

Significant effects are recorded on criteria such as: plant vigor, yield, fruit coloring, sugar content, caliber, firmness, shelf life and many other quality improvements.
